

Sound Training

Many pupils will take part in Sound Training during their time at Islwyn High School. Sound Training is a new teaching programme that teaches students to read for knowledge. It is aimed at students who have real potential and we are delighted that we are now delivering it to our learners.

At Islwyn High School we set high expectations for all our students and strive to ensure all achieve the grades they are capable of. We also believe that Sound Training will help them achieve their goals across all subjects.

The programme trains students to decode subject specific words quickly and effortlessly. It teaches them the complexities of the English language allowing them to develop a deeper understanding of the subjects they are being taught.

The programme runs for six teaching sessions (one hour per week) for six weeks. The course is challenging, very fast and FUN!

If you would like to find out more about Sound Training and the programme please visit www.soundtraining.co.uk.
